Proposal triage: evidence before ranking

Syed Jawad Shah | MATACS-TH-2026-02 | Configurable criteria; human award

H Human checkpoint

R Rules / ordinary code

AI AI extraction

H | Admin configuration

Set category, fact definitions, gates, weights, scales and dates.
Validate and publish an immutable criteria version.

H | Upload and choose category

Reviewer uploads; code scans files and retains source hashes.

R | Text extraction

PDF text / OCR; preserve source IDs and page locations.

AI | Candidate fact extraction

Generic prompt + admin definitions -> evidence-backed JSON.
Return nulls and warnings; ignore and log embedded instructions.

R | Validate candidate facts

Check schema, evidence matches, units, dates and contradictions.

CLARIFY / alert

Corrected evidence -> VALIDATE

H | Flagged / clarify

Missing or ambiguous facts,
D timeline or C security alert.
No score or rank until resolved.
Obtain evidence; log corrections.
C earns no bonus or penalty.

Fact edit

Valid facts

CLARIFY

R | Mandatory checks

Bidder licence, WSIB, insurance; price <= CAD 260,000;
confirmed completion <= 16 weeks from award.

FAIL

R | Ineligible

Demonstrated mandatory failure.
B: future subcontractor does not
satisfy bidder-held licence rule
on submitted evidence; this is
not proof B has no licence.
Score null; rank null.

PASS

H | Review before release

Validate evidence and optional omissions; clear security alerts.
Fact edits return to validation; no silent requirement waivers.

Approved; no open flags

R | Score and rank

Only cleared, eligible proposals; frozen facts + criteria version.
Deterministic scores, reasons and audit; retain original results.

H | Final human award decision

Human records decision, reasons and any authorized exception.
Policy changes use a new version applied to every proposal.

Corrections and clarifications always repeat validation and mandatory checks before scoring.

Exceptions: separate authorization, reasons, evidence, original and revised results; no silent gate bypass.

Sample only: A/C/E experience validation and C alert clearance are assumed, not events claimed to have occurred.
